Wilbert Alix has earned international recognition as a contemporary healer and teacher of progressive psychology and neo-shamanism. All Dynamic Mythology Experience utilizes five contemporary shamanic movement and dance-based modalities for accessing levels of shamanic trance. Wilbert says of this workshop: "My intention is to bring into focus the enormously complex worlds of mysticism, psychology, shamanic spirituality and science for the purpose of clear direction and achievement"

With Wilbert Alix, you will explore various body-centered, altered states first hand, resulting in the embodiment of wisdom and the discovery of alternative solutions to difficult situations. The answers received in these visionary journeys can be tremendously powerful.

Shamanic cultures experience the entire body as a thinking organism rather than limiting intelligence to the physical brain. By stimulating the body and mind simultaneously shamans journey to parallel realities where solutions to seemingly unsolvable problems come clear. These dynamic vision journeys are legendary, providing the foundation for both individual and cultural wisdom.
